ChunkScope API Documentation

1. Introduction

ChunkScope provides a comprehensive API for document processing and retrieval-augmented generation. This documentation covers the core endpoints, authentication, and usage examples.

2. Authentication

All API requests require authentication using JWT tokens:

```python
import requests

headers = {
'Authorization': 'Bearer YOUR_TOKEN_HERE',
'Content-Type': 'application/json'
}

response = requests.get(
'https://api.chunkscope.com/v1/documents',
headers=headers
)
```

3. Core Endpoints

Method	Endpoint	Description
GET	/api/v1/documents	List all documents
POST	/api/v1/documents	Upload a new document
GET	/api/v1/chunks	Retrieve document chunks
POST	/api/v1/analyze/document	Analyze document structure
